

## Description

The new generation of ASSASSIN II has preserved key features from ASSASSIN of great heat dissipation performance: Nickel-plated heatsink, 8 high-performance heatpipes, mirror finished copper base. In addition, ASSASSIN II has some upgrade parts that compared with ASSASSIN, it offers asymmetric twin-tower design, and uses new release fan-GF140 for excellent performance-noise ratio. However, breakthrough has been created for its special designed PWM fan with Min. 300RPM for extreme silence. ASSASSIN II is designed for new generation CPU thermal requirement.
